

JACKAL CREEK GOLF ESTATE

This golf estate is designed to offer an active and rewarding modern golf estate lifestyle. Signed up in November 2019.

KEY BENEFITS

Jackal Creek found the following key benefits switching to AssetPool's smart inspection software:

- **Golf cart physical condition verification & monitoring** - Jackal Creek Golf Estate now have a live status of the condition of their equipment which will decrease golf cart downtime
- **Golf course maintenance management** - The golf course maintenance team now have live updates on the status of the greens, holes, tee boxes etc.
- **Staff efficiency & performance management** - The employees have increased efficiency through the ability to send completed inspections digitally rather than having to hand in paper checklists.

HOW DID ASSETPOOL HELP

Jackal Creek recently purchased around 70 new Golf Carts with built-in course GPS management. Their previous fleet had to be replaced due to the condition of the carts. AssetPool checks the carts out in the morning and checks the carts on return. If the player has caused damage to the cart the club is now able to recover these costs.

Furthermore there was a need for better record keeping of course maintenance and compliance. The club's management can now, without a doubt, ensure that their course is being attended to by the green keeper and his staff as required.
